

How Does an Indexed Universal Life (IUL) Policy Work?

Protection for your family + a savings account that can grow tax-free — explained in about 60 seconds.

Protection
When life happens

Growth
Cash value that builds

Family Security
Peace of mind

ONE POLICY, TWO JOBS

Your Money Goes In
A simple monthly contribution
SPLITS INTO ↓

BUCKET #1 Protection Bucket
Life insurance that protects your family — with living benefits you can use if a qualifying illness strikes.

Critical Illness
Chronic Illness
Terminal Illness

 Plus a **tax-free death benefit** for your loved ones

BUCKET #2 Savings Bucket
Cash value that can grow over time, linked to the performance of a market index — such as the S&P 500.

S&P 500 Index
500 top U.S. companies

Grows tax-deferred

 You are **not** invested directly in the stock market

THE KEY IDEA — FLOOR & CAP

Protected on the way **down**, growing on the way **up**.

BAD MARKET YEAR

-20%
The Market

0%
Your IUL

Protection Floor — you don't lose value when the market drops.

GOOD MARKET YEAR

+15%
The Market

Up to Cap
Your IUL

Growth Opportunity — you grow up to a maximum "cap."

No Market Losses. Opportunity For Growth.

Caps, participation rates, fees, and crediting methods vary by carrier and policy design.

ACCESS WHILE YOU'RE ALIVE

Reach your cash value when you need it.

Opportunities

Emergencies

Retirement Income

Family Needs

Available through policy loans or withdrawals. Loans & withdrawals may reduce policy values and benefits if not managed properly.

WHY IT MATTERS

Why families choose **IUL**.

Life Insurance Protection

Living Benefits

Tax-Advantaged Growth

No Market Losses

Access To Cash Value

Tax-Free Death Benefit

Retirement Income

All In One Policy

An IUL is designed to help **protect what matters most** while creating opportunities to build **financial security** for the future.
